EDUCATION

University of Guelph

Bachelor of Computing, Software Engineering (Co-op), Minor in Business

Sep. 2021 – Apr. 2026

GPA: 3.7/4.0 (83.7%)

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, TypeScript, SQL, HTML, CSS, R, Cobol

Frameworks: React, Node.js, Express.js, Next.js, Spring Boot, Jest, JUnit, Tailwind CSS, Bootstrap, pandas, jQuery, Flutter

Tools: Git, Docker, Bash, SQLite, MongoDB, Azure DevOps, Firebase, Android Studio, SonarQube, VS Code

Operating Systems: Linux, Windows, macOS

WORK EXPERIENCE

Teaching Assistant

Sep. 2025 – Dec. 2025

University of Guelph

Guelph, ON

- Conducted labs teaching **Java object-oriented programming** concepts such as classes, **Encapsulation**, **Abstraction**, **Inheritance**, and **Polymorphism**.
- Helped develop **Java autograder test cases** for assignments, assessing code correctness, edge cases, and requirement coverage.

DevOps Engineer Intern

Jan. 2025 – Aug. 2025

University of Guelph

Guelph, ON

- Built **CI/CD pipelines** in **Azure DevOps** using **YAML** to automate build and deployment stages for project migrations, reducing manual deployment effort by 60%.
- Migrated legacy **frontend components** from **Polymer** to **React**, eliminating deprecated dependencies and improving maintainability on a modern stack.
- Automated around 90% of manual backlog management by integrating Microsoft **REST APIs** with **Azure DevOps**, reducing repetitive operational overhead through urgency-based workflow routing.

Software Developer Intern

Jun. 2024 – Aug. 2024

University of Guelph

Guelph, ON

- Developed responsive UI components using **React**, **JavaScript**, and **Bootstrap**, including navigation elements, content layouts, and mobile-friendly interfaces to enhance user experience across the platform.
- Resolved 50+ frontend **bugs** across university websites using **JavaScript**, **HTML**, and **CSS**, improving card alignment, component spacing, accessibility, and cross-device responsiveness.
- Collaborated within an **Agile/Scrum** team using **Azure DevOps** to manage user stories, work items, and track bugs.

Web Developer Intern

Sep. 2023 – Dec. 2023

University of Guelph

Guelph, ON

- Built and maintained **AODA-compliant**, responsive web pages across 12+ departmental websites using **HTML**, **CSS**, and **Bootstrap**.
- Increased website traffic by 11% by redesigning layouts, styling, and brand consistency across faculty pages using **CSS** and **Bootstrap**.

PROJECTS

Workforce Skills Analysis | *Python, NLP, Sentence Transformers(SBERT), Entity Linking, Pandas, NumPy, Matplotlib*

- Built a **supervised NLP entity linking pipeline** using **SBERT** and cosine similarity to map job-posting skills to the Canadian SCT 2025 taxonomy.
- Preprocessed job postings and taxonomy data using **Pandas** and **NumPy** for NLP pipeline input.
- Created **Matplotlib** visualizations of skill trends across STEM and BHASE postings for comparison and analysis.

TripVibes | *Flutter, Dart, Firebase Authentication, Cloud Firestore*

- Built a cross-platform **Flutter** and **Dart** mobile app that matches users with travel buddies based on travel style.
- Integrated **Firebase Authentication** for user sign-in and **Cloud Firestore** for user profile and match data storage.

AI Image Generator | *React.js, Express.js, Node.js, MongoDB, OpenAI API, Tailwind CSS, HTML, CSS*

- Developed an AI image generator that enables the generation and sharing of AI-generated images.
- Integrated **Express.js** and **Node.js** to define **REST API routes** and handle **HTTP requests**.
- Utilized **useState Hooks** to manage loading states to ensure seamless user experience during data fetching.
- Managed loading states in React components using **useEffect Hooks** for handling **asynchronous operations**.
- Defined a **Mongoose** schema to facilitate structured data storage in a **MongoDB** collection.

Chem Learner | *Python, jQuery, C, SQLite, HTML, CSS*

- Developed a full stack website where a user can view, rotate and build molecules from a sdf file.
- Used **Ajax** to transfer **JSON** data between the **Server** and **Client** through **HTTP** requests.
- Integrated **C** functionality with the **Python HTTPServer** library using **SWIG**.
- Used **SQLite** for Molecule data storage where the **Server** can have a **read/write** capability to the database.
